Barrett. 12 mo. Inla book is destined to revolutionise the entire comfortable house at less than one-balf the ordinary price of brilding.

The materials for the walls are simply gravel, or small stone, coarse sand, and tike, which, when nnit-cd, become in a short time as bard as common rock, and the ordinary skill or a common laborer is all that is needed to construct the fluest house.

This book is a treasure to every poor man who desires to have a home of this own, comfortable and desires to have a home of the own, comfortable and desires in the without costing a fortune.

Every man who inleads building should buy this book, it will be worth to him a nandred times its cost before he is done building.—[Masonic Review.
